

Call for Papers

a Session on

Nanomanufacturing and Nanoinformatics

2018 International Symposium on Flexible Automation (ISFA2018)
Conference Center of the Kanazawa Chamber of Commerce and Industry
July 15-19, 2018, Kanazawa, Ishikawa, Japan

Session Technical Focus

Scalable nanomanufacturing is crucial to fulfill the promise of nanotechnology. Full-scale production demands systematic knowledge regarding robust product/process design, synthesis or processing techniques, metrology and inspection, and process modeling and control. The integration of manufacturing science with advanced statistics in each critical stage has been instrumental for the successful transformation of quality and productivity. We cordially invite you to submit a paper to share your knowledge and expertise in all areas related to **Nanomanufacturing and Nanoinformatics**. Papers from the industrial sector are particularly encouraged. The session welcomes both theoretical and applied papers in areas including, but not limited to:

- Scale-up process design and development
- Scalable nanofabrication techniques
- Metrology, inspection, and sensing for nanomanufacturing
- Nanomanufacturing process modeling for scale-up
- System informatics and control in nanomanufacturing
- Reliability modeling and analysis for nanodevices and processes
- Robust design for nanomanufacturing

Paper Submission

The deadline for submission of your contribution to this session is **January 15th, 2018**. Both short and long papers will be considered and reviewed. For short papers, please submit an abstract of 300-500 words (a camera-ready manuscript is limited to 2 or 4 pages) and, for long papers, please submit a manuscript of no more than eight pages. All summaries and manuscripts should be submitted through the conference website at <http://w3a.kanazawa-it.ac.jp/ISFA2018/>.

Session Organizers

Takaya, Yasuhiro, Osaka University
Huang, Qiang, University of Southern California
Li, Xiaochun, UCLA
Zou, Qingze, Rutgers University
